Multigame systems for today are the most demanded at the world's gambling market.
Components
Pedestals and spacers

Pedestals and spacers are designed for all cabinet-type game machines and they help to create a unified composition of machines in a game arcade. The main features of accessories are harmonious design, qualitative materials and durable polymer coating. Pedestals are equipped with easily removable doors and places to store gaming components. Ergonomic shape and compact dimensions allow harmonious arrangement of game machines in a gaming club.

Pedestal is made of black polymer coated steel
Lockable compartment for coins on the front panel
Steel footrest
Storage space for the game machine components or other necessities
It is suitable for any Belatra cabinet type game machines
Dimensions (W*D*H): 602x600x

Spacer is made of black polymer coated steel
Form – row
Allows you to place game machines in different compositions: "near the wall", "back to back", etc. Dimensions (W*D*H): 250x400x452 mm

Placement variations of slot machines in the hall
Components

Signs

The stylish proprietary sign - a great addition to slot machines of your game hall!
Spectacular sign complete with a media controller is available in two possible versions: single-sided wall option or double-sided with an additional floor support. These installation options allow you to use a group of machines with the sign in any part of your game hall.
The sign design can be any of your choice. You can choose one of the options of sign external design or create your own unique design together with designers, developers and technologists of Belatra Co.
The sign design has been developed taking into account the features of Belatra slot machines. To display information about the jackpots and prizes the sign construction allows the LCD monitor with any diagonal.
Housing of jackpot sign made of organic glass with a spectacular milling and laser cutting. LED and neon modules are mounted in the housing.
LED modules support 10 different flashing modes, which can be easily changed by remote control. The sign is convenient and easy to install.
Multimedia panel and modules for indoor advertising

«Promo-i» - the multimedia panels and modules that can play audio-visual files in different directions—from simple static screensavers to full movies with sound track.

Innovative control system of our equipment enables:
+ quickly and easily to create media plans;
+ remotely to control and change the advertising content;
+ to implement visual control with the help of web cameras installed in some models;
+ and others.
